(c) 2016. Pedro J. Molina
```

Usage sample:

Generates the `model1.ngeprj` into the `output` target folder.

```
bin/esl-nubo gen -m models/model1.ngeprj -o output
```

Docker pack and run:

```
cd output
./build.sh
./up.sh
docker ps
```

Open the docker file at `http://192.168.99.100:8443` (IP can vary depending on local docker installation).
